

The image displays two views of a green printed circuit board (PCB) assembly, labeled 'Bottom' and 'Top'.

Bottom View: This view shows the reverse side of the PCB. It features a large silver heat sink on the right side. Various electronic components are visible, including capacitors (e.g., 333, 220, 10V), resistors, and integrated circuits. A label '101939-30' is present near the bottom center. The PCB is mounted on a brown carrier board with four mounting holes.

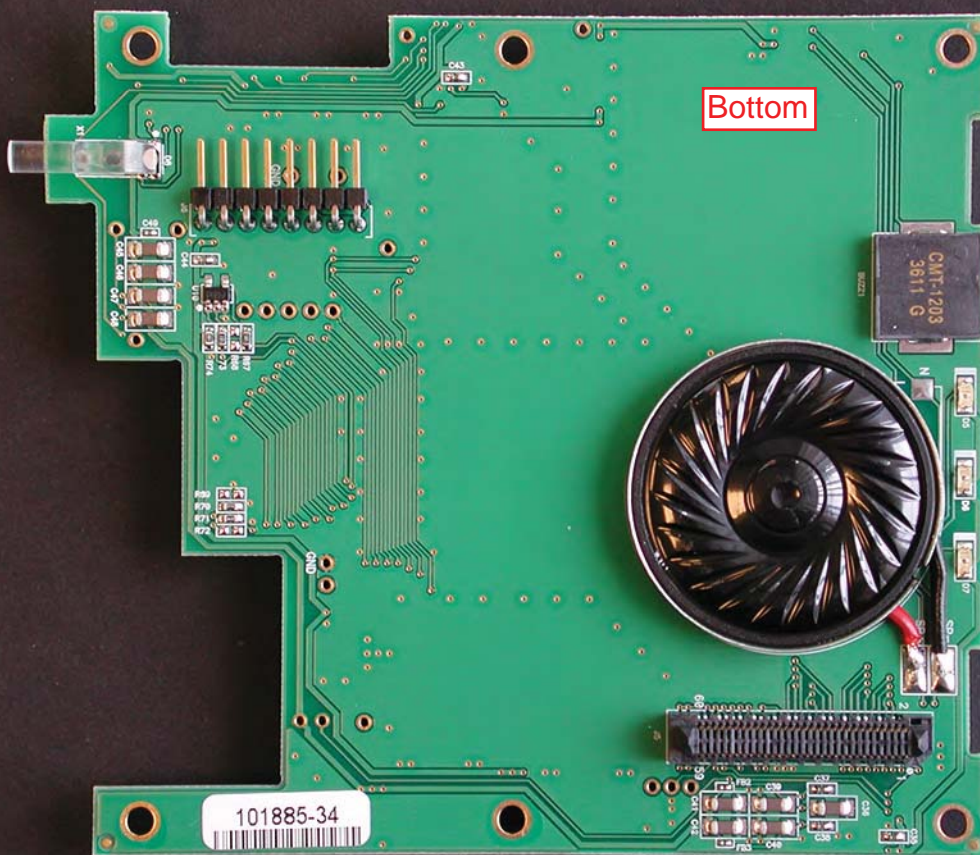

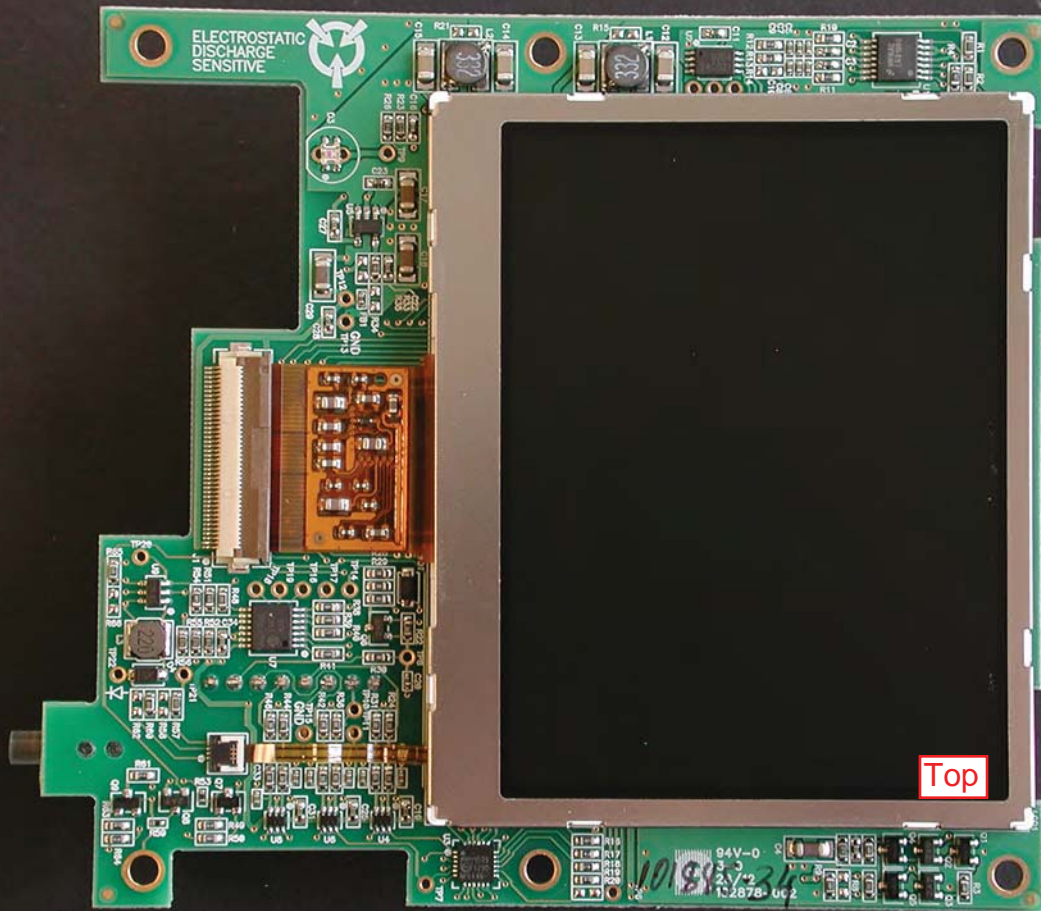

Top View: This view shows the front side of the PCB. It features a large silver heat sink on the left side. Various electronic components are visible, including capacitors (e.g., 5V1cc, 3.3V1cc), resistors, and integrated circuits. A label '101939-30' is present near the bottom center. The PCB is mounted on a brown carrier board with four mounting holes.
